Outstanding School Assemblies

Circus of Sound

A unique, foot-tapping, smile-inducing spectacle for the eyes and ears.

Internationally acclaimed musician and entertainer, Bronkar Lee is a rhythmic pioneer in performance art. Through the use of body percussion, drumming and vocal percussion (beat-boxing), Bronkar combines music and rhythm with skilled juggling to create an interactive, energetic and dynamic experience like no other performance.

An experience where students feel inspired by what is humanly possible.

The magic of juggling balls and unique sound effects are created *without* a sound system. Audiences are awed by the technical skill and complex rhythms created with just one voice and a few props. Your school is at the edge of their seats to find out what's next.

This one-man rhythmical dream of audio-visual delight motivates creativity and self-expression.

Circus of Sound can be customized to fit your school's needs a for a variety of topics and can be formatted for different age groups. General concepts presented include: team building, self-expression, seize the day, how to channel energy productively, be creative, and invent something new.
